Solve each anagram, then find the results in the wordsearch grid. Each anagram is a character's name from the show. I haven't been too nasty – all are returning regulars or semi-regulars, but sometimes it's just one of their names, sometimes two (or more!) All forenames and surnames are separate in the grid.

To get you started, "SIARHOETERNL" is "HARRIETOLESEN", so now find "HARRIET" and "OLESON" separately in the grid.
